

Putting Rail to Work for You

Streamline Your Supply Chain with CSX Warehouse Services

A CSX rail-served warehouse can help you take advantage of the economic and environmental benefits of rail. These independently owned and operated sites are designed to store commodities like food, paper, metal, building materials and other consumer goods.

Why Use a CSX Rail-Served Warehouse?

- Dedicated support team
- Industry-leading E-Business tools
- Experienced customer service
- Extended market reach
- Strong commitment to safety
- Reduced environmental impact

The Process:

Shipping

A railcar is shipped from its origin to the warehouse.

Receiving

The warehouse receives the railcar at their dock.

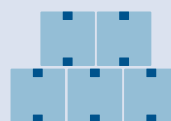

Unloading

The contents of the railcar are removed safely and efficiently.

Storage

Product is stored on-site. Short- and long-term agreements are typically available.

Delivery

The product is transferred to short-haul trucks for the final leg of the journey.

Getting Started

To learn more about how your business can benefit from rail, please contact our industry-leading team at **WarehouseServices@csx.com**.

Common Questions about Warehouse Services

Q: Is rail a good choice for my business?

A: Contact our Inside Sales team at **NBD@csx.com**, or call 1-877-SHIPCSX Option 5, Option 1 for a consultation to find out.

Q: Which warehouse(s) can handle my product at origin/destination?

A: To select a warehouse and locate a convenient facility, visit **www.csx.com/warehouses**.

Q: How much will it cost?

A: To receive a price quote, please contact the selected warehouse or contact the CSX Warehouse Service team at **WarehouseServices@csx.com** for assistance.

By taking advantage of CSX rail-served warehouses, you will experience seamless incorporation of rail into your supply chains, PLUS:

- The benefits of rail service without the maintenance responsibilities of industrial tracks
- Expanded market reach
- Eliminates the need to establish a privately owned and maintained rail siding
- Increased reliability and flexibility
- Products positioned closer to your end users
