

Drawing Guidelines

Below are general guidelines to assist you in the development of application drawings/plans for review and approval by CSX.

Drawings

Each application submitted to CSX must include drawings/plans for the proposed project. The drawings should be no larger than 11 x 17 (inches) in size.

Plan and Profile

CSX has developed plan and profile drawings illustrating **required** data as outlined in CSX's Design & Construction Standard Specifications for both pipeline and wireline occupancies. The tables in the drawings identify the information that is **required** for CSX to complete a review of your proposal. Drawings for your use include:

- **Instructional:** identifies information **required for submittal**
 - *Plan View*
 - *Pipeline Profile View*
 - *Sub-grade Wireline Profile View*
 - *Aerial Wireline Profile View*
 - Click [here](#) to view and/or download instructional drawings
- **Canvas:** templates which can be saved and information inserted electronically
 - *Plan View*
 - *Pipeline Profile View*
 - *Sub-grade Wireline Profile View*
 - *Aerial Wireline Profile View*
 - Click [here](#) to download and use Canvas templates

Please review the instructional drawings prior to completing your proposal drawings. The drawings contain tables requesting specific information. While this information may not be necessary for your particular operation or industry, it is **required** for CSX to properly consider the proposal. Requests submitted that do not include the required information will be declined.

When using the blank canvas templates, please note the following:

- A current version of Adobe Reader (or use of Adobe Acrobat Version 8 to current) is required. To download a current version of Adobe Reader, please click [here](#) (click on "Get Adobe Reader")
- Once the blank canvas template is open and selected, click on the "Highlight Fields" button in the top right section of the screen. All fields that can be completed electronically will appear in a light blue color. For easier navigation, you may also press the tab key on your keyboard to move the cursor from field to field.
- Ensure that **all** applicable fields in the table(s) are completed and in compliance with CSX's current Design & Construction Standard Specifications for both Pipeline and Wireline occupancies.
- Once the tables are completed, click in the large image area to upload the plan or profile view of the drawing. If desired, click in the small image area to upload your company log. **Please Note:** Before loading the drawing and company logo, ensure you save a copy of them as an image file (file extensions of: *.jpg, *.gif, *.png, or *.tif). All other file types, including PDF files, will not load into the image fields.
