

CSXT FUEL SURCHARGE PUBLICATION 8662

Rail Mileage Based/Highway Diesel Fuel

APPLICATION: This publication applies to all regulated common carriage and public exempt line haul freight rates existing or established by CSXT on or after January 1, 2015 that reference this publication.

In the event that the monthly average price per gallon of highway diesel fuel (as determined below, the "HDF Average Price") equals or exceeds 375 cents, CSXT will apply a mileage-based fuel surcharge to the linehaul freight rates and charges described above. The fuel surcharge will be applied to each qualifying shipment of a railcar having a bill of lading or other shipping instruction dated on or after the first day of the second calendar month following the calendar month of a given HDF Average Price determination.

The "HDF Average Price" for a month will be the average price for that month of U.S. No. 2 Diesel Retail Sales by All Sellers, as determined and published by the U. S. Department of Energy, Energy Information Administration ("DOE-EIA")¹. That average price will, in calculating the HDF Average Price, be rounded to the nearest 1/10th of a cent applying conventional rounding principles. The fuel surcharge will be 1¢ per mile per railcar for every 4¢ per gallon, or portion thereof, by which the HDF Average Price for the calendar month two months prior to the calendar month of shipment exceeds 374.9 cents.

If DOE-EIA ceases publication of the above information, CSXT will employ a suitable substitute source of price or measure.

The mileage to be applied in calculating the fuel surcharge will be based on rail miles between origin, interchange(s) and destination, and can be derived from CSXT's rail mileage look-up system and facility found at www.ShipCSX.com.²

The following table reflects a sampling of the fuel surcharge within the included HDF Average Price ranges.

The fuel surcharge will be 70¢ per mile per railcar plus 1¢ per mile per railcar for every 4¢ per gallon, or portion thereof, by which the HDF Average Price exceeds 654.9 cents.

When CSXT is the billing railroad with respect to a joint rate as to which another railroad's fuel surcharge is to be applied, the mileage (if any) used in calculating the fuel surcharge will be derived from CSXT's rail mileage look-up system and facility which can be found at www.ShipCSX.com.²

¹ The referenced DOE-EIA publication can currently be found at www.eia.doe.gov. On the home page select "Petroleum;" under "Prices" select "Weekly Retail Gasoline and Diesel Prices;" for the "Area" select "U.S.;" for the "Period" select "Monthly;" then refer to the data on the line entitled "Diesel (On-Highway)." Monthly data is normally published Wednesday after the last Monday of a given month.
