

CSXT FUEL SURCHARGE PUBLICATION 8661-B

Fuel Surcharge – Rail Mileage Based/Highway Diesel Fuel

(N) No change – Reissued to extend the sample table.

APPLICATION: This publication applies to: (1) all regulated common carrier linehaul freight rates existing or established by CSXT on or after April 23, 2007; and (2) all linehaul freight rates and charges with respect to exempt traffic, and linehaul freight rates and charges in contracts, private price quotations or other pricing documents, that both reference this publication and are entered into or issued and effective on or after April 23, 2007.

In the event that the monthly average price per gallon of highway diesel fuel (as determined below, the “HDF Average Price”) equals or exceeds 200.0 cents, CSXT will apply a mileage-based fuel surcharge to the linehaul rates and charges described above. The fuel surcharge will be applied to each qualifying shipment having a bill of lading or other shipping instruction dated on or after the first day of the second calendar month following the calendar month of a given HDF Average Price determination.

The “HDF Average Price” for a month will be the average price for that month of U.S. No. 2 Diesel Retail Sales by All Sellers, as determined and published by the U. S. Department of Energy, Energy Information Administration (“DOE-EIA”)¹. That average price will, in calculating the HDF Average Price, be rounded to the nearest 1/10th of a cent applying conventional rounding principles. The fuel surcharge will be 1¢ per mile per railcar for every 4¢ per gallon, or portion thereof, by which the HDF Average Price for the calendar month two months prior to the calendar month of shipment exceeds 199.9 cents.

If DOE-EIA ceases publication of the above information, CSXT will employ a suitable substitute source of price or measure.

The mileage to be applied in calculating the fuel surcharge will be based on rail miles between origin, interchange(s) and destination, and can be found at www.csx.com.²

(N) The following table reflects a sampling of the fuel surcharge within the included HDF Average Price ranges.

When CSXT is the billing railroad with respect to a joint rate as to which another railroad’s fuel surcharge is to be applied, the mileage (if any) used in calculating the fuel surcharge will be derived from CSXT’s mileage lookup system and facility which can be found at www.csx.com.²
